Introduction

Welcome to your new home at Jade! Your home was carefully crafted to bring you comfort, safety and beauty for many years to come. The plans have been thoroughly analyzed and inspected during every step of construction to ensure your home meets all applicable performance standards and to assure quality.

Tien Sher Homes has prepared this Homeowner's Maintenance Manual to serve as your guidebook to maintain your home. Proper maintenance will prevent minor problems from becoming major headaches. We have included simple explanations on how to handle basic repairs, maintenance and minor adjustments. .

Becoming familiar with the information in this manual will help you maintain your home's built-in quality, while helping to prevent costly future repairs. Please read it carefully. These maintenance recommendations are intended to provide you with a basic understanding of the maintenance requirements of your home, however, should any questions arise, please contact Tien Sher Homes customer service directly at 604.484.8488 or service@tiensher.com.

Please keep this manual so it is easily accessible and ensure all family members become familiar with their roles in keeping your new home looking great for years to come.

Note: *This manual is not intended to deal with all common property maintenance issues related to a strata titled residential project. Common property maintenance is the responsibility of the Strata Corporation and additional training and information is required.*

Your Property Management Company

MAGSEN REALTY INC.

3173 Main Street
Vancouver, BC V5T3G8

c/o Eric Chung, Property Manager

Phone: 604.872.3218

Email: ericchung@magsen.ca

Website: www.magsen.net

Your new home is legally described as a strata lot but owning it is still very much like owning your own single family home. Continued regular maintenance is the responsibility of the individual homeowner. Exteriors and common grounds around the development are maintained by the owners as a group.

The Strata Corporation is made up of all of the owners in the complex and is governed by the Strata Property Act of British Columbia. A Strata Council of up to seven owners is formed to represent the owners and administer the rules and regulations and conduct the business of the Strata Corporation. The Strata Corporation usually has a property management company (Magsen Realty Inc.) who provides services to the owners for the day to day maintenance, book-keeping and reporting needed to operate a strata corporation in an efficient manner. Owners elect the Strata Council yearly at the Annual General Meeting.

Your strata lot is comprised of the area within your home measured to the center line of all demising walls and outside of the exterior wall. The common property consists of all areas outside the strata lot and areas within the building that are available for use by all of the owners. Balconies, patios and parking spaces are sometimes designated limited common property if they are meant to be used exclusively by one owner. Any modifications to the exterior of the building, including the balconies and patios, can only be made if permission for the modifications has been obtained from the Strata Council.

The Property Manager is there to assist you regarding the operation of the Strata Corporation. On behalf of the owners, they consult and coordinate rules and regulations, maintenance fees and Strata meetings. The Strata Corporation, through the elected Strata Council, determines policy. This policy is communicated to the owners through the rules and regulations and the council meeting minutes. The Property Manager is usually authorized by the Strata Council to enforce the rules and regulations.

Remember that you and your neighbors own this complex. Tien Sher is here to assist you should servicing be required. All warranty work will be reviewed using the guideline established by the warranty provider.

All inquiries, including deficiencies regarding maintenance or warranty work for the common areas should be directed to your Property Manager through the Strata Council.

Setting Up Your Home

Power Outages & Electrical Emergencies:

1.888.769.3766

1. Check whether the power failure is limited to your home or business. If your neighbour's power is still on, check your circuit breaker panel or fuse box.
2. Call BC Hydro at 1 888 POWERON (1 888 769 3766), *HYDRO (*49376) on your cell phone or report online. Tell us about the outage so we can send the right crews and equipment to the right location.
3. Tune into your local radio station or check this website for storm and power outage updates.
4. Turn off all appliances, including computers and peripherals, especially those that generate heat. This helps prevent hazards or damage when service is restored.
5. Turn off all lights except one inside your home/business and one outside. The inside light lets you know and the outside light lets BC Hydro crews know when the power is back on.

Gas Leaks & Gas Odor Emergencies (FortisBC):

1.800.663.9911

If you smell rotten eggs, go outside first then call FortisBC.

Please note that some of the above information may change without notice

Service Procedures

Emergencies

An emergency is defined as a situation that seriously threatens your home, its occupants, or both, such as listed below.

Gas Leak

- Smell rotten eggs or if you hear the sound of escaping gas, it could be natural gas. Stop what you are doing. Do not use your cell phone or landline, don't smoke, light matches or operate electrical switches or create any other source of ignition
- Go outside and leave the door open.
- **Call 1.800.663.9911**

Water Leak

- Defined from a source that cannot be identified and contained.
- Plumbing leaks in the walls, floors and ceilings
- Complete sewage back-up (all toilets)

Water Line Burst

A water line can burst due to a number of reasons, such as a loose joint, freezing, etc. and should be dealt with immediately. If no shut-off exists, locate the main water shut-off (usually located where the water line enters your new home on the ground level or basement), and turn it off until the problem can be identified and repaired. It is also advisable to turn off your hot water tank to prevent overheating while the water supply is shut off.

Electrical Problem

1. If all the power to your new home is out.
 - Check to see if there is a power blackout in your neighbourhood. (see emergency numbers)
 - If not, check your main breaker (in the electrical panel) and reset it after checking for a current overload.
2. Plugs & Outlets
 - If a plug or outlet sparks excessively, immediately turn off the breaker and contact Tien Sher Homes Customer service at 604.484.8488. A small spark when an appliance is unplugged is not uncommon.

Note:

If an Tien Sher Home emergency call is made and a service call is dispatched and it is determined a non-emergency a service charge may be applied and an invoice will be sent to the homeowner.

Non-Emergency

The following may be covered under warranty but are considered a non-emergency however, it still needs prompt attention. They could pose a safety hazard or which left unattended until the end of the warranty period, will do greater harm to your home. These will be addressed as quickly as possible during ***normal business hours Monday – Friday, 8:00 am – 4:00 pm.***

Some examples are:

- Loose railings
- Leak at drain under sink or toilet
- Telephone or television cable jacks not working
- Water seepage of any kind such as slow leaking under a sink, new stains or visible dampness
- Baseboard heater not working
- Window cracks
- Exterior door/windows that no longer fit or function properly
- Cracked or broken tiles in the shower

Not Responsibility of the Developer

- Developer is not responsible for appliance repairs after the initial sale closing date. Tien Sher Homes has partnered with the appliance supplier and they have provided a 12 month manufacturer's warranty. Please contact the supplier with your serial and model number for service request.

Year End Attention (Inside Your Home)

Throughout the first year, your home will generally experience some settlement/shrinkage of the building components (particularly the wood framing materials) which will result in some minor cracking of drywall, tiles or other cosmetic flaws. Floor squeaks may also occur. It is a good idea to deal with these items towards the end of your first year of occupancy to allow for the majority of the settlement to occur.

One full year less one day following the initial commencement date the homeowner has a second opportunity to report construction defects. Request must be received in writing before the one year anniversary date. They will be repaired only once during the warranty period. It is recommended that you wait until near the end of your warranty period before requesting repairs.

Note: All drywall repairs are sanded and ready for painting. Please note we do not repaint.

The developer will only repair warrantable items once during the term of the warranty. The homeowner will be responsible for remedying subsequent, at the homeowner's cost.

Service Request Procedures

Request for Service

Please mail, fax or email your written request using the attached form directly to:

Mail:

Tien Sher Homes
Attention: Customer Service Department
#185-4631 Shell Road, Richmond, BC V6X 3M4

Phone: 604.424.8488

Fax: 604-273-0685

Email: service@tiensher.com

Online: www.tiensher.com under the tab "Homeowner care" and click on your home project "Jade"

Please make sure you include the following information when sending the "Service Request"

- Include Unit number, name of the project, telephone numbers, home, work and/or cellular.
- As much information describing the problem as this will assist our team to assess the situation and quickly expedite the service request.

Example:

John Smith
Unit #8 9691 Alberta road
Ph: 778.555.5555
Email: myemail@hotmail.com

Master bath: cracked floor tile
Main floor: baseboard heater not working.

Upon receipt of your request, the Customer Service Department will call to schedule an appointment for service in your home during normal business service hours (8am-4pm, Monday-Friday). Our Service Department is not available weekends. It is the homeowner's responsibility to be available and allow us access to their homes during weekday hours in order to do any service work.

We will make every effort to complete repairs as quickly as possible. However, due to the types of repairs encountered and the fact that we may have to involve sub-trades, some delay is possible. We ask your patience as we will address it as quickly as possible.

All requests for service are processed in the order received, except requests of an emergency nature. For questions regarding the status of service repairs, please call, or email our Customer Service Department.

Please ensure that you review all of your warranty documentation closely so that you are aware of all deadlines and complaint procedures.

Service Request:

Protecting Your Investment

As per Section G of your Travelers Guarantee home warranty certificate, you are required to maintain your new home and mitigate any damage to your new home, including damage caused by defects or water penetration.

You must take all reasonable steps to restrict damage to your home if the defect requires immediate attention.

For defects covered by Travelers Guarantee warranty, the duty to mitigate is met through timely notice in writing to Tien Sher Homes and Travelers Guarantee.

An owner's duty to mitigate survives even if:

1. the new home is unoccupied;
2. the new home is occupied by someone else other than the homeowner;
3. water penetration does not appear to be causing damage; and/or
4. the owner advises the strata corporation about the defect.

Unfortunately, if a defect occurs or is made worse due to an owner's failure to follow the maintenance procedures provided, or to mitigate any damage, it will be excluded from warranty coverage.

Your Role as a Homeowner

Your role during the first year is very important. There are several things you should keep in mind to make certain your warranty serves you well.

- Read all operation manuals that were supplied with your home.
- We suggest that you do not wallpaper in the first year. This will enable you to find shrinkage cracks in the drywall and allow us to do the repairs. Of course you should feel free to paint and decorate your home as you choose.
- Be sure to read your New Home Maintenance Manual. It is important to make sure you use all equipment properly, especially in regard to humidity control, kitchen fans and other moisture control devices within your home.
- Keep informed of your Strata Council – especially in regard to the common area warranty. This common area warranty begins with the first possession or occupancy of the first home in the building and therefore, the expiry for the common area may be different than the expiry on your own home.

Warranty Coverage

In accordance with the Homeowner's Protection Act, Tien Sher Homes provides mandatory 2/5/10 year warranty coverage through Travelers Guarantee Company of Canada. When you take possession of your new home, you will sign and be given a copy of the Warranty Commencement Certificate number. Your warranty becomes effective on the date of closing. Travelers will provide you with detailed information on warranty coverage shortly after you move in.

First 12 months of Coverage

Your home has been constructed in accordance within the applicable building codes. Many materials such as wood and concrete have certain inherent qualities which may require some servicing.

If the workmanship and materials do not perform to the standards set by the warranty provider within the first 12 months we will make repairs as necessary. During the first year, please report any items, in writing, to our Customer Service Department. Please explain the concern giving the location and as much detail as possible. Tien Sher Homes retains the right to refuse warranty service for items that, upon inspection, have been caused by abuse, neglect or lack of maintenance.

Items not considered defects in workmanship or materials include, but are not limited to:

1. Normal shrinkage or warping as per the guidelines outlined in the warranty provider Materials and Labour Standards Guide.
2. Purchaser supplied material or appliances, and design and defects in other workmanship or materials related to purchaser supplied materials or workmanship.
3. Damage caused by/or resulting from the failure of the purchaser to maintain adequate ventilation and/or heat to the new home.
4. Damages resulting from move-ins.
5. Normal wear and tear.
6. Maintenance repairs, such as plugged toilets, burnt out light bulbs, etc.

Drywall cracking and nail pops are normal occurrences in the first year of occupancy. These types of occurrences should wait until the end of your first year to be repaired. We recommend that you do not apply wall coverings or custom paint in the first year. Should you elect to do either of these, we cannot accept responsibility for damage to your walls caused by drywall cracks. Tien Sher Homes is under no obligation to re-decorate wall areas affected by drywall repairs. Owners should consider the effect of any repair in areas of custom wall paint or wallpaper.

Travelers Canada Warranty

Following is a summary of the 2/5/10 year warranty from Travelers Guarantee Company of Canada's website. For complete warranty coverage information of your home, refer to your Travelers Guarantee Company of Canada 2/5/10 Year Home Warranty Certificate.

Great homes are built on strong foundations

Protecting your investment in your new home

A new home is likely the largest investment of your lifetime. If you have purchased a new home built and sold by a Travelers Canada approved builder, you are eligible to protect your investment from defects from the trusted leader in new home warranties in British Columbia.

B.C.'s Homeowner Protection Act and Regulations, which has been in effect since 1999, outline specific details about the mandatory home warranty coverage. We believe that BC's program, commonly referred to as 2-5-10 Year Home Warranty, is the most comprehensive home warranty available in North America. Travelers Canada's comprehensive 2-5-10 Year Home Warranty Certificate provides new homeowners with important home protection and coverage both before and after buying a new home.

What's covered under a 2-5-10 Year Home Warranty Certificate

2 Year Material & Labour Warranty

- First 12 months – Coverage for any defect in materials and labour
- First 15 months – Coverage for any defects in materials and labour in the common property of a multi-unit building
- First 24 months – Coverage for any defect in materials and labour supplied for the electrical, plumbing, heating, ventilation and air-conditioning delivery and distribution systems. In addition, coverage for any defect in materials and labour supplied for the exterior cladding, caulking, windows and doors that may lead to detachment or material damage to the new home

WARRANTY COVERAGE Continued...

5 Year Building Envelope Warranty

Coverage for the building envelope for up to five years for defects in the building envelope of a new home, including a defect which permits unintended water penetration such that it causes, or is likely to cause, material damage to the new home.

10 Year Structural Defects Warranty

Coverage for structural defects for up to 10 years for:

- Any defect in materials and labour that results in the failure of a load-bearing part of the new home
- A defect that causes structural damage that materially and adversely affects the use of the new home for residential occupancy

Care and Maintenance Guide

Appliances

The appliances supplied for your new home are covered by a one-year manufacturer's warranty. It is the responsibility of the homeowner to contact the supplier directly for any service needs:

Contact: Coast Wholesale Appliance Service Department at 604.301.3421.

Clothes Dryer: Dryer lint trap must be cleaned after every use. Failure to do so may void the warranty.

Please refer to the manuals supplied by the manufacturer for more information on operation. When you are using your dishwasher or washing machine for the first time, please do not leave it unattended in case any leaks occur. When using the self-cleaning feature on your range, please open the cabinet drawers and doors on either side of the oven to avoid damage from the high heat until the cleaning is completed. The heat can affect the cabinet finish.

BBQ Hazard

When using your barbeque on your deck area, please keep it away from the siding as the heat may damage the vinyl. This damage will not be warranted.

Cabinets

When cleaning cabinet doors, use only warm soapy water and a soft cloth or a damp cloth. Never use an abrasive powder or liquid cleaner or an abrasive pad on any cabinet surface. Do not use any solvents, thinners, or mineral spirits on cabinet surfaces. Ensure that water and other liquids are not left in contact with cabinet surfaces. Please note that warranty will be null and void in cases where damage is due to standing water.

Engineered Stone Countertops

Daily maintenance should involve no more than wiping with a damp cloth and drying with a towel to prevent water spots. If you wish to use something other than water, there are cleaning products specifically designed for stone. Stone countertops are resistant to staining, but not impervious to grease and oil. Wipe immediately to avoid dark spotting. Keep counters dry whenever possible to prevent water from penetrating the countertop seam. Please note that warranty will be null and void in cases where damage is due to standing water.

Care and Maintenance Guide Continued ...

Flooring

Carpets: To keep carpets looking new, we recommend these simple rules: avoid soil accumulation and use walk-in mats at all entrances. In areas of heavy traffic, it is recommended that carpet be vacuumed at least two times per week. Make sure you have adjusted the attachments to the proper height for your carpet. Have your carpets professionally cleaned at least once a year. This keeps your carpet looking beautiful longer.

Ceramic Tiles: For routine cleaning use a mild detergent; do not use waxes or sealers. As the grout is porous and will absorb water which will lead to staining, annual sealing of the grout joints with a clear liquid silicone sealer should be carried out.

Hardwood Laminate Flooring: Immediately blot up spills or spots with a lightly damp cloth. Frequently vacuum or dust your floor to prevent dirt and grit from scratching or dulling its finish. Use mats/area rugs to trap grit which otherwise can damage the surface. Use good quality felt protectors on all furniture legs. Avoid use of spiked heel shoes as these can leave indentations or scratches which are not covered under warranty. Do not use soap or detergents to "damp mop" the floor and never pour water directly onto the floor. Do not wax the floor or use ammoniated cleaners, steel wool or abrasive pads on your floor. Lacquer thinners or acetone should not be used to remove spots.

Hardware

In all cases, cleaning with a damp cloth is recommended. No abrasive cleansers or other household cleaners should be used. Taps and faucets should be cleaned with clear water and dried with a soft cloth. Do not use chemical cleaners or abrasive pads as these products may cause damage to the finishes. Steel wool pads will cause the finishes to become dull and porous. Green staining of fixtures is usually a water related issue due to the chemical compositions in the water and is not a builder defect.

Windows and Ventilation

Windows have small drainage holes located in the track area of the frame. Owners should periodically clean these holes, removing any dirt or bug residue to ensure a clear flow passage. If you experience condensation on the surface of any inside window, it's due to too much moisture in the air. Please use the fans in the bathrooms after a bath or shower to prevent excess moisture in the air. A ventilation timer is wired to your bathroom fan. Disconnecting this may result in voiding your home warranty. Occasionally opening a window, even slightly, provides a great deal more air than is otherwise available in your home and is recommended.

Care and Maintenance Continued ...

Electrical

Ground Fault Interrupter (GFI) Circuit Breakers and Plugs: Make sure all breaker switches are on. These breakers measure the current passing through the circuit. If there is excessive draw, such as running two high wattage hair dryers at the same time, the power is interrupted. Bathrooms are on dedicated circuits. If there is more than one bathroom, one of them will have the GFI and this one will reset all bathroom plugs in the home. These should be tested once a month to ensure they are working properly. Simply press the test button while operating an appliance and this will create a short. To reset, push the reset button on the outlet as designated.

Switched (Duplex) Outlets: Some outlets in the home have one half of an outlet controlled by a switch. For example, a lamp can be switched at the entrance to a room by using the wall switch (as opposed to at the lamp) if the lamp is plugged into the upper (or lower) outlet. Also, please be aware that if you choose to plug a cordless telephone into this outlet and then use the wall switch, it may cause your phone to shut down.

Kitchen Plugs: Plugs are split in two so that the top and bottom halves are on separate circuits. This allows you to plug in two high draw appliances in the same outlet without tripping a breaker.

Smoke Detectors: Smoke from cooking, baking, or even moisture from showers can set off a smoke detector. Fan the area of smoke or steam to turn off the alarm or open a window to ventilate quickly. Always use the range hood fan in the kitchen while cooking.

All smoke alarms are electrically operated (not battery). The Fire Department recommends testing the alarms a minimum of twice a year, suggesting when the daylight savings time changes.

Plumbing

Showers: All fixtures are designed to conserve water. This means there is normal pressure but a restricted volume of water.

Toilets: All toilets are designed to conserve water. This means that only normal waste and toilet tissue may be flushed. Do not flush paper towel or sanitary products.

Insinkerator: Run cold water through it before, during and after emulsification. Avoid greases as they may cause blockage and fibrous foods that can jam the pivots. Run a few ice cubes through every 4-6 months for maintenance. Make sure the thermal protector has not tripped if the Insinkerator fails to come on.
